## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 02/17/2009 has been entered.

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 02/17/2009 was filed after the mailing date of the notice of allowance on 11/14/2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Allowable Subject Matter***

Claims 1 and 3-29 are allowable over prior art of record; renumbered as claims 1-28 (respectively).

The following is an examiner's statement of reasons for allowance:

The cited prior arts (US 2002/0159805 to Sato; US 5580041 to Nakayama) of record teach an image forming apparatus having guide members that guide printed media in and out of the image forming apparatus, but fails to teach and/or suggest *"a plurality of flexible guide members arranged widthwise of the paper, each flexible guide member having a first guide side, and each flexible*

*guide member flexing in a first direction to guide the recording medium toward the exit path member and balance with itself with the force applied by the recording medium when the recording medium exits the printing unit and contacts the first guide side and returning to an original position by flexing in a second direction opposite to the first direction after the paper completely passes through the printing unit; and a reverse path which branches out of the exit path between the exit of the printing unit and the exit member, so that the direction of the movement of the paper, which moves backward along the exit path, is reversed and again supplied into the printing unit when the exit member rotates in a reverse direction, wherein each guide member further comprises a second guide side which guides the paper, which goes backward along the exit path, along the reverse path" in combination with the other claimed limitations and/or features as recited in independent claims 1 & 29.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
